PILLAR

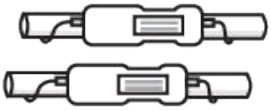

Humidity & Temperature

Water on the floor

Remote Flow Monitoring

Remote Shut Off Control

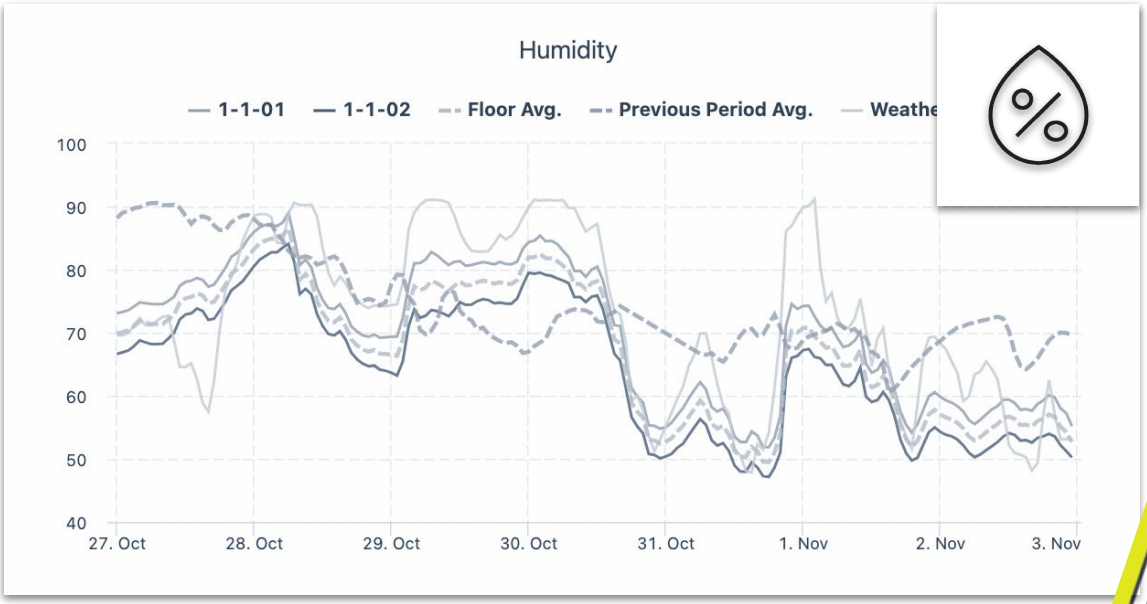

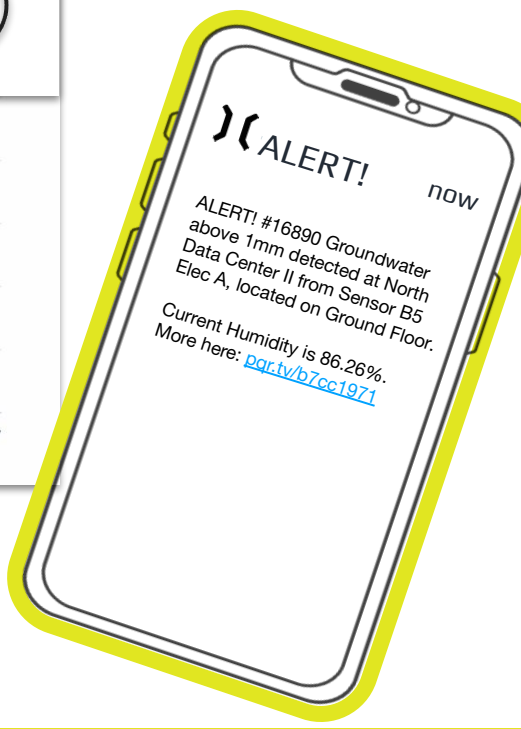

DETECT HUMIDITY
Humidity signals onset of water damage. When it rises quickly spikes your team is alerted.

DETECT WATER
As simple as a mousetrap, Leak Pucks instantly detect standing water on contact

DETECT FLOW
If water flow changes in pipes unexpectedly, you'll be alerted.

REMOTE SHUT OFF
If unwanted waterflow is detected, you have the power to shut off pipes with a few clicks on your phone.

LEARN FROM TRENDS OVER TIME
Pillar delivers an unbroken data record of site conditions for the life of the job site. Our data can prove you did the job right, and give you the insights you need to keep improving faster than the competition.
